Notes: 1. The number of students that either met or did not meet the TAKS standard is a count of the students taking a course from a teacher having years of professional experience within a defined range and the course is related to the TAKS assessment for a particular school year, grade, TAKS subject area and TAKS test language version. 2. TAKS assessments include only students taking TAKS tests on the TAKS primary test administration dates. 3. The "Unknown" years of experience category is the number of students where no data relationship exists between the teachers and their students' performance on TAKS.

Notes: 1. The number of students that either met or did not meet the TAKS standard is a count of the students taking a course from a teacher having years of professional experience within a defined range and the course is related to the TAKS assessment for a particular school year, grade, TAKS subject area and TAKS test language version. 2. TAKS assessments include only students taking TAKS tests on the TAKS primary test administration dates. 3. The "Unknown" years of experience category is the number of students where no data relationship exists between the teachers and their students' performance on TAKS.

Teachers who taught both mathematics and reading/English language arts are counted once in each subject.

TAKS Test Results for Texas Public Students by Teacher Years of Experience

Purpose	<p>This report shows the relationship between teachers' years of professional experience and their students' performance on TAKS tests in mathematics or reading/English language arts (ELA). It displays the percent or count of Texas public students that either met or did not meet the TAKS passing standard by school year, school grade, TAKS subject, TAKS test language version, and the number of years of professional experience for the teacher of record.</p> <p>Data in this report are reported at the statewide and region levels.</p> <p>For in-depth information on TAKS statewide participation and performance results, see the Texas Education Agency (TEA) Division of Student Assessment reports on TAKS assessment results at http://www.tea.state.tx.us/student.assessment/results/.</p>
Data Source	<p>Data in this report come from the Texas Public Education Information Management System (PEIMS) and the Texas P-16 Public Education Information Resource (TPEIR). Only those students who took a TAKS, TAKS-LAT, or TAKS-Accommodated test version and took a mathematics and/or reading test on the TAKS primary test administration dates are included in this report.</p>
Data Elements	
Texas Assessment of Knowledge and Skills (TAKS)	<p>The primary statewide testing program implemented in 2003 was designed to measure the extent to which a student in grades 3-11 has learned and is able to apply the defined knowledge and skills at each tested grade level. A student must meet the standard on the four Grade11 exit level TAKS tests in order to receive a high school diploma from a Texas public high school.</p> <p>The TAKS testing program is being replaced by the State of Texas Assessments of Academic Readiness (STAAR) testing program. For more information on STAAR, the phase-out plan for TAKS and the phase-in plan for STAAR, visit the Texas Education Agency Student Assessment Division website http://www.tea.state.tx.us/student.assessment/.</p>

TAKS Test Results for Texas Public Students by Teacher Years of Experience

TAKS Primary Test Administration	The primary test administration provides the results for all students who submitted an answer document the first time the test is administered for a particular subject, grade, and school year.
TAKS Test Subject	The subjects tested by TAKS include math, reading, English language arts (ELA), social studies, science, and writing. All grade levels are not tested on all subjects. For more information, see the Texas Education Agency Student Assessment Division website http://www.tea.state.tx.us/student.assessment/ .
TAKS Test Language Version	TAKS test versions are administered in English and for grades 3-5 in Spanish. A student may take different language versions for different subjects. The English and Spanish versions of TAKS assess the same test objectives and Texas Essential Knowledge and Skills (TEKS) student expectations.
Met Standard	Met Standard in this report refers to the Panel Recommended category representing satisfactory academic achievement. Students in this category performed at a level that was at or above the state passing standard for that TAKS test.
Teacher of Record	Indicates that the teacher is responsible for the classroom, making the final decisions about the instruction delivered and the final outcomes for the students assigned to the class.
Teacher Years of Experience	<p>Teacher Years of Experience is total years of professional experience which is the number of verifiable years of creditable experience as specified in 19 TAC, Chapter 153. (For more information on 19 TAC, Chapter 153 see http://www.tea.state.tx.us/index4.aspx?id=2147505941.) Professional experience includes all experience where the teacher worked in a professional capacity (e.g., teacher, administrator, certified personnel, etc.). It does not include experience in a paraprofessional role (e.g., educational aide or interpreter) or in an auxiliary staff role (e.g., secretary or bus driver).</p> <p>In this report, Teacher Years of Experience is categorized by seven ranges: 0 years, 1 to 3 years, 4 to 5 years, 6 to 9 years, 10 to 19 years, 20 or more years and “unknown”. The “unknown” category indicates the number of students where no <u>data relationship</u> exists between the teachers and their students’ performance on TAKS</p>

TAKS Test Results for Texas Public Students by Teacher Years of Experience

	<p>for which they were the teachers of record. In other words, for the specific courses and TAKS assessments used in this report the teacher of record is unknown so the years of professional experience cannot be calculated.</p>
Number of Students	<p>The number of students is a count of students that either met or did not meet the TAKS performance standard for mathematics or reading/ELA TAKS tests taken on the primary test administration dates for a particular school year, grade, TAKS subject area and TAKS test language version. The count includes only students taking a course from a teacher having years of professional experience within a defined range and the course is related to the TAKS assessment for a particular school year, grade, TAKS subject area and TAKS test language version. The number of students under the "Unknown" years of experience category is the number of students where no data relationship exists between the teachers and their students' performance on TAKS.</p>
Total Number of Students	<p>The total number of students is a count of students taking TAKS tests on the TAKS primary test administration dates for a particular school year, grade, TAKS subject area and TAKS test language version. The count includes only students taking a course from a teacher having years of professional experience within a defined range and the course is related to a TAKS assessment for a particular school year, grade, TAKS subject area and TAKS test language version.</p>
Percent of Students	<p>The percent of students is calculated as the number of students who met or did not meet standard divided by the total number of students who took the test.</p>
Number of Teachers	<p>The number of teachers is a count of teachers having years of professional experience in the indicated range. The "Unknown" category is not applicable to "number of teachers". A particular teacher is counted in only one experience range but may be counted more than once if they are the teacher of record for both mathematics and reading/ELA courses which are related to TAKS assessments.</p>
